

SAFETY AND SECURITY SOLUTIONS

CONTENT SNAPSHOT

Estimated at USD 350 million, the security systems sector in India has grown robustly in the last few years. However, the gap between vulnerability and security is a large one.

Promoting that securing businesses is as critical as building them, Mint is coming out with a special report on the security industry in India. In particular, Mint will look at:

- Emerging technologies in professional security systems: An end-to-end look across surveillance, access control, intrusion detection and communication systems.
- Integrated solutions: How can customization work for businesses.
- ROIs behind security solutions: where to invest and what to expect?
- Where luxury and security meet: Security solutions for high end living.
- Software for Hardware: The best solution providers for robust systems.

Reaching out to corporate heads and business owners; with this report, Mint will empower its readers to keep their businesses secure.
